18 INCH GLASS CEILING FIXTURES

The 18 inch Glass Ceiling Fixture has built-in high technology LED chips, making light bulbs unnecessary. This LED light is fully dimmable and flicker-free, to create the perfect atmosphere that compliments your mood and time of day. With a 120 degree of a beam angle, it provides lower-ceiling homes with even illumination, on command. The round and modern silhouette of this light adds elegance to your living space. The simple, classic design is suitable for a broad range of different themes and decors. Ideal for use in common areas, such as lobbies, foyers, hallways, corridors, living rooms, bedrooms, bathrooms, offices, restaurants, stairways and more. This light has an inner shade made from Opal Glass that gets rid of any glares or dark spots for an ambient, diffused light. The clear glass outer shade surrounds the inner one. Holding the product in place with stability and strength is a powder-coated white steel ceiling plate. Energy efficient 30W to replace 120W halogen/incandescent light, saving your electricity bill substantially. Extremely long lifespan of 50,000 hours.

SPECIFICATIONS

• Wattage	30W	• Input Current	0.25A
• Lumens	1800lm	• IP Rated	IP20
• CCT	3000K	• CRI	90
• Input Voltage	120V	• Lifetime	50,000 hrs.
• THD	<20%	• Dimensions	18" x 3 3/4"
